

# DECISION MAKING – PRO’S AND CON’S

Denise Chrisman

**This is an old classic but is one of the easiest ways to see both sides of a decision.**

Consider a possible choice for a decision.

List the pro’s  
(The positive impact and benefits)

---

---

---

---

---

---

---

---

---

---

List the Cons  
(Negative impact and losses)

---

---

---

---

---

---

---

---

---

---

**Consider the following:**

- Which list has more?
- Which of the “Pro’s” is the most significant and meaningful to you?
- Which of the “cons” would have the most significant negative effect?
- Is it worth it?
- Do the pro’s outweigh the con’s?

Always consider that the decisions that have the greatest effect on our lives are usually the hardest to make. Take time and give careful consideration to all the decisions you make. In many cases, once a decision is made, the consequences of that decision are permanent.
